R 401 + C 166

1-component PU adhesive +
seaming tape for
bonding artificial turf

STAUFLUX KLEBSTOFFWERK GMBH

Oberhausener Str. 1 . 57234 Wilnsdorf . Germany

2109/250/EN

ALL-WEATHER PRO

STAUF TECHNOLOGY Whether for tropical climates or cold: The 1-component PU adhesive STAUF R 401 is particularly suitable for bonding artificial turf, even if there is light rain or at cool temperatures.

The 1-component STAUF R 401 is ready for immediate use. In addition, the hardening of the solvent-free PU adhesive can be accelerated by moistening the adhesive corrugations.

SUITABLE SUBFLOORS

Fine grit

PU rubber granulated material

STAUF SUPPLIES

Adhesive applicator machine

REVOLUTIONARY ADHESION

EXTREME WEATHER CONDITIONS Summer temperatures, light rain or cold: With the STAUF R 401, the weather will certainly not play havoc with your plans.

- Very economical
- Accelerated hardening at high humidity
- Ideal foaming resulting in extremely good wetting
- Bonding is possible even in extreme climatic conditions

FLEXIBLE SEAMING TAPE

IMMUNITY TO CRACKS AND GAPS STAUF has put together the best team for your artificial turf. The athletic turf fleece STAUF C 166 is designed for heavy-duty use and together with the STAUF R 401 provides unbeatable protection from cracking or gaps.

- Highly resilient
- Aging-resistant
- Not sensitive to frost
- Particularly elastic
- Non absorbent
- Waterproof
- Heat and cold-resistant
